Senior Game Designer

Senior Game Designer with 10 years of experience developing and operating commercially successful games across Mobile and Steam, spanning Midcore RPG, Casual, and Puzzle genres. Core expertise lies at the intersection of Combat Systems, Level Design, and Monetization. Blends creative mechanics design with in-depth data telemetry to craft highly engaging player experiences that drive sustainable commercial growth.

CORE SKILLS & EXPERTISE

Game & Systems Design

- Combat system design, character skill kits & LiveOps meta balancing
- In-game economy, F2P monetization models (IAP, Gacha) & progression loops
- Level design, combat pacing, 2D/3D arena layouts & multi-phase Boss mechanics
- Tactical AI behavior trees
- Player journey mapping & UI/UX wireframing

Game Engines

- Unity Engine (Level design blockout, Prefabs, UI implementation)
- Working knowledge of sound design and real-time VFX

Technical & Analytical

- Software programming & Computer Science foundation
- Advanced Excel & Google Sheets (Economy modeling & combat math simulation)

Leadership & Production

- Strategic roadmap planning & end-to-end feature ownership from concept to launch
- Mentoring, onboarding, and providing creative direction to junior game designers
- Cross-functional coordination and sprint alignment across Design, Art, and Engineering
- Data-driven decision making via telemetry frameworks and behavioral analytics

Software & Project Management

- Trello, Notion
- Version Control: Git, SVN
- Figma, Miro, Audacity

WORK EXPERIENCE

RIDDLERS VN, Senior Game Designer — *08/2025 – Present*

- ***Eternal Paradox (Mobile, LiveOps)***
  - Audited complex data architecture across hybrid 4X/RPG systems; re-engineered legacy balance models across both gameplay layers (Turn-based RPG Mercenaries and 4X territory/castle building) to safeguard long-term stability and prevent power creep and hyperinflation across Web2 mobile and Web3 ecosystems.
  - Executed data-informed META rebalancing for the Mercenary roster based on actual usage telemetry, directly enhancing player retention and IAP revenue.
  - Established long-term live service operational roadmaps, including Mercenary release cadences, recurring event schedules, and new feature pipelines.
  - Rebuilt the Design KPIs & Telemetry Framework to track player behavior, progression chokepoints, and limited-time offer conversions, optimizing retention and LTV.
  - Directly investigated and resolved fraudulent transaction patterns and payment exploits.
  - Balanced progression parity between F2P mobile users and open-economy token/NFT participants without compromising core gameplay integrity.
- ***SKIDDDDDD: Tori's Frozen Racing (Steam, Shipped 2026)***
  - Served as Lead Game Designer, architecting the development roadmap and guiding the team through full production to a successful commercial launch on Steam (PC) in April 2026.
  - Mentored and directed the level design team in constructing dynamic ice racing tracks utilizing modular building block workflows.
  - Standardized the track creation pipeline from whitebox blockouts to environment dressing (props, foliage) and atmospheric VFX integration, ensuring intuitive visual signposting and optimal racing lines.

ONEUNIVERSE VN, Senior Game Designer — *03/2025 – 06/2025*

- ***Shaman King: Funbari Chronicle (Mobile, Cancelled)***
  - Re-architected and balanced character progression curves and talent mastery trees to align with modern mobile RPG benchmarks.
  - Overhauled the competitive META and structured a seasonal character cadence synchronized with narrative chapter releases based on existing skill sets and character rosters.
  - Optimized monetization packaging and gacha mechanics, lifting paying user conversion rates and buyer satisfaction.
  - Spearheaded the design of the Idle House Management feature, integrating interior customization systems with character affinity mechanics.

DIVMOB, Game Designer / Middle Game Designer ***05/2016 – 01/2025***

- ***Eternity Legends (Mobile, Shipped 2018)***
  - Generated 500K+ pre-registrations and surpassed 2M+ total downloads worldwide.
  - Selected for the prestigious Google Play Indie Games Accelerator program.
  - Designed and tuned combat systems, hero rosters, and evolving META throughout the product lifecycle.
  - Designed level architecture, difficulty curves, and reward distribution for Adventure, Sky Scraper (Tower), Star Gates, Global Boss, and PvP Arena modes.
  - Formulated live-service operational roadmaps and recurring event cadence.
  - Designed tiered IAP bundles and gacha drop tables, maintaining fair competitive balance across payer tiers.
- ***Fantasy League (Mobile, Shipped 2020)***
  - Surpassed 500K+ total downloads globally.
  - Co-developed core combat mechanics, battle pacing, and hero class systems.
  - Designed and operated seasonal events, live-ops updates, and content drops throughout the game's lifecycle (2020–2022).
  - Penned the campaign narrative, world lore, and designed challenging multi-phase Boss encounters.
  - Designed and balanced enemy AI behavior trees to ensure tactical depth, unpredictability, and engaging counterplay.
  - Configured system data tables, premium shop packages, and daily reward retention loops.
  - Produced video ads, trailers, and new character spotlights.
- ***Legions War: Art of Strategy (Mobile, Shipped 2021)***
  - Surpassed 1M+ total downloads globally.
  - Engineered a hybrid battle system combining base/king defense with large-scale tactical army command; balanced unit archetype stats, formation placement, and upgrade costs.
  - Designed campaign difficulty curves and tailored tactical combat mechanics for Giant Bosses and Enemy Commanders.
  - Architected a procedural level difficulty generation system, significantly reducing manual design overhead and production time.
  - Designed the core unit-merge mechanic and tier progression tree, balancing casual accessibility with tactical depth.
  - Designed a hybrid monetization model pairing IAP (Monthly VIP subscriptions, army progression packs) with rewarded ad placements (4x post-match multiplier).
- ***Warriors Defend: Castle Defend (Mobile, Shipped 2022)***
  - Surpassed 1M+ total downloads globally.
  - Tuned warrior balance, stage upgrade costs, and dynamic enemy wave scaling to preserve strategic depth in offensive and defensive siege gameplay.
  - Designed progress bars and reward economies for Challenge Mode and Dungeon expeditions, optimizing player grinding goals.
  - Architected a procedural level difficulty generation system, significantly reducing manual design overhead and production time.
  - Designed timed reward chest mechanics and integrated rewarded video ad triggers across dungeon and system menus.
  - Rebalanced early-game difficulty curves based on cohort analytics, measurably boosting D1/D7 player retention.

EDUCATION

Ho Chi Minh City University of Technology – VNU-HCM (HCMUT)

- **Bachelor of Science in Computer Science** *Graduated 2017*
